

ALPHAbet Activity WORKSheets

Is your child ready to learn the letters of the alphabet? They will love these colorful worksheets, full of fun activities. Your child can learn to write their name and write each letter of the alphabet. Each worksheet has a coloring picture for your child to color. In addition, they will practice cutting small pieces of paper to glue onto each rectangle as they learn their colors. This set is perfect for preschoolers or kindergarten students.

Help your child learn to write by having them grasp a pencil or crayon, then place your hand over theirs and show them how they trace and write each letter. Eventually they will be able to do it on their own. Tell them the name and sound and have them repeat after you. Review the letters they have learned each day or week.

Directions

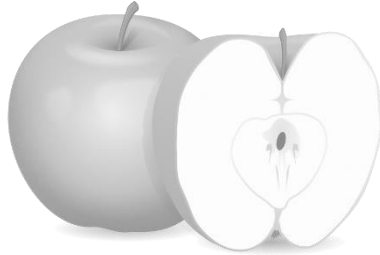

Write their name. Say the name and sound of the letter, having them repeat after you. Practice tracing and writing the letter. Trace the shapes and lines for more practice. Color the coloring picture using crayons, markers, or water color paint. Last, give them a piece of construction paper that corresponds with the color they will be learning about. Say the name of the color. Cut small pieces of the paper and glue into the rectangle area.

******For the cutting project on each worksheet, you may want to provide small one inch strips of paper for beginner cutters, rather than a big piece of paper. If they are not ready for cutting and gluing, then have them scribble with the specified color of crayon or marker.
